

Dividing up a block of Oasis for use in display vase

Soak a full block of oasis in water until it stops taking water

Place the block face up (as the image at right)

Using a sharp knife cut the block length ways

And roll the cut piece towards yourself

Cut the half into 7 wedges (as shown at right)

(You may like to cut a bit larger, (six wedges) if you are going to have multiple stems in one vase)

This block was cut into 14 wedges ready for the vase

Press the wedge into the vase, you will find that it becomes very firm.

Cut larger wedges and trim the corners to fill the vase for multi flower exhibits.
